

Freight Transport Strategies in the City of Malmö

Challenges for Freight Transports in Malmö today

- Urbanization
- Air quality
- Traffic noise
- Traffic safety
- Climate change

- The Northern Harbour
- Transit transports

- "Regard freight transports as a transport mode equal to the other modes of transport within the city planning process"

A Freight Transport Programme

Godstrafikprogram för Malmö

Externremiss 2013-09-11

Overall Objectives of the Programme

Freight transports should...

1. Function well according to the city conditions
2. Create growth in the city and in the region
3. Minimalize negative impacts on the environment
4. Contribute to a safe and secure traffic system

Strategies to Reach the Objectives

1. Cooperation with external stakeholders
2. Focus on citylogistics as part of the attractive city
3. Develop sites in Malmö to confirm the role of the city as a logistics node
4. Renewable fuels and clean heavy vehicles
5. Increase level of knowledge and awareness among the planners within the city administration

One example: Citylogistics

- Project Leader
- Review of dedicated areas
- Review of local traffic regulations
- Local network for freight transports
- Project coordinating city deliveries

Ett Malmö där man
hellre är ute än inne
